Experience superior lighting performance with the new addressable spot

Featuring high brightness of 330 lumens and cutting-edge LED technology is designed to provide instant and reliable illumination, even in the most demanding conditions.

Equipped with a self testing function, this innovative fixture monitors the status of both the battery and the light source every 15 days.

These automated periodic tests significantly reduce maintenance needs, ensuring long-term reliability. Engineered with attention to detail and practicality, the compact and discreet design blends seamlessly into any interior space without compromising aesthetics.

Ideal for installation in suspended ceilings, it integrates effortlessly with Olympia Electronics' addressable control panels. Additionally, it offers a selectable autonomy of up to 3 hours, making it the ultimate solution for projects where safety and performance are non-negotiable.
